

Ejercicio 2

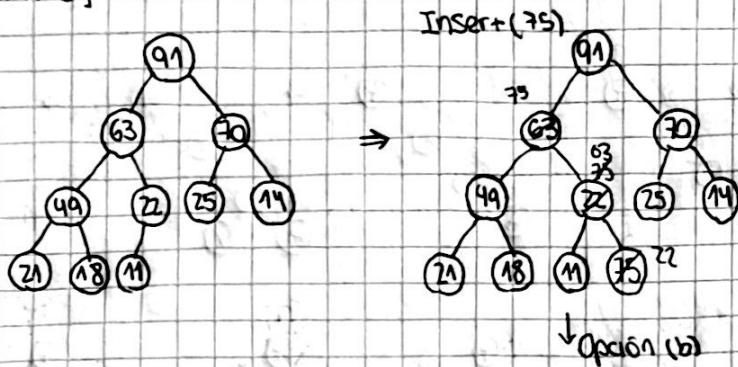

Ejercicio 3

a. Grado $K=4$

Altura $h=3$

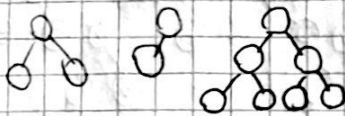

$$N = (K^h + K - 2) / (K - 1) \rightarrow N = (4^3 + 4 - 2) / (4 - 1) = (66) / 3 = 22 \Rightarrow \text{Opción (b)}$$

b.

(d, f, m, n, b, a, o, g, p, c, h, s, q, j, e, x) \Rightarrow Opción (b)

d.

4
